

U.S. ARMED FORCES MEDICAL LIBRARY.  
REFERENCE DIVISION

A BIBLIOGRAPHY OF MILITARY MEDICINE  
UNITED STATES AND FOREIGN  
1950 - 1955

Articles and books relating to military  
medical history and current military  
medical organization.

Washington, D. C.  
September, 1955

## NOTE

The following bibliography contains references to books and articles in the history of military medicine and in current military medical organization at the staff level from 1950 to date.

Sources searched have been the standard medical bibliographies (Current List of Medical Literature, Abstracts of World Medicine, Excerpta Medica, Quarterly Cumulative Index Medicus, etc.) and the literature itself. Articles published in journals not in scope to the Library's collections have not been included.

In view of the forthcoming History of the U. S. Army Medical Department in World War II, articles relating to military medicine in the United States for World War II were included only when they were especially comprehensive. Brief annotations have sometimes been added.
